I find I have no male  
Californian Coryla.

I did not see anything  
in my coll. etc. more with  
sending you now, or I would  
have sent the genus cores.

I post you to-day Cross-  
vidence about Parry's removal.

I think of putting  
important about Swanthe-  
ced - stems.

I have had Might  
back up & I have  
despatched a parcel  
containing Swanthe a case  
of Hull's original coll. -  
I notes, & all the Abie-

But you may as well  
retain your own set -  
picking it out for your  
self

I have here not been  
out of house now for a  
full ~~week~~ ~~as~~ week  
- on account of tremendous  
cold on lungs, & harassing  
cough - am getting the  
better of it. But I cough  
deadly at times.

So I cannot go to Boston  
to see Redoute & L. about  
the Yucca of which you  
sent leaf [the broadleaved Fort Mott Plant]  
Bot. Mag. & you would  
soon to be that plant.

Yours of 2<sup>d</sup> inst has been  
here some days. The plants  
not back yet. (Halls)

I am waiting for them  
to finish the distribution.  
I have for print a list  
of the plants, with com-

me any thing on the Piss-

print in a few weeks.

What a pity. I sent  
you by parcel a set of  
the Callitrichis to name.  
Sorry you did not get  
them. Well, you shall  
have them in time, in  
your set.

I think Marius Cat's

You may send your

of doing so I will settle
